 - Onboard Dimming
- RoHS Compliant (Restriction of Hazardous Substances)
 - CUL Compliant
 - EMC Compliant (Marine Standard)
- 88,000 hour lamp life (with data available at 68,000 hours)
- Maintenance Free operation for up to 15 years

The 50 Degree Beam fixture is the brightest in the range and can be used for anything from emergency lighting to ambient lighting from 5m to 30m. With unprecedented thermal, drive and current light output capabilities, it offers lighting industry leading lumens per package and enclosed in the BlueBeam housing it offers a totally flexible IP68 solution for any type of application.

At an average mounting of .75m using the K2 Warm White the size of the beam would be 1.5m Diameter with a light level of 42 LUX.

This fixture is ideal for high level ceilings and awkward out of the way mountings, delivering a good punch of light.
