- Maintenance Free operation for  
up to 15 years

The 5 Degree Beam fixture is versatile bright fixture and can be used for anything from emergency lighting to ambient lighting from 3m to 10m. With unprecedented thermal, drive and current light output capabilities, it offers lighting industry leading lumens per package and enclosed in the BlueBeam housing it offers a totally flexible IP68 solution for any type of application.

**At an average mounting of 8m using the K2 Warm White the size of the beam would be 2m Diameter with a light level of 25 LUX.**

This fixture is ideal for high level applications and awkward out of the way mountings, delivering a good punch of light. IES Information to follow: IES information to follow;
