Single Zone PSU Switched

Specifications

- Single Zone wall mount PSU
- Input Voltage 85-264V AC
- Input Frequency 47-63Hz
- Nominal Output Voltage
12VDC
- Max Load: 10 x Beam/Dome
- CE Compliant
- CUL Compliant
- Easy Wall Mount Installation
- Low Profile Case
- Size: 145mm x 230mm x
45mm

The GDSBSPS1 is a single zone switched power supply for the Blue Dome and BlueBeam range of light fittings. It is the ideal Power Supply when designing a small scale installation or multiple location within a single venue.

The unit is compact in its design and can be wall mounted for permanent installation or adapted via Hook Clamp to be temporarily installed.

With the switch electronics you can either set a maximum level for the fixtures and then switch on/off or you can add a BSDM1 Dimming Module allowing you to dim up to 2 circuits with a maximum of 5 x Fixtures on either one.
