- Maintenance Free operation for up to 15 years

The 20 Degree Beam fixture is one of the specialised fixtures in the range and can be used for anything from emergency lighting to ambient lighting from .5m to 2m. With unprecedented thermal, drive and current light output capabilities, it offers lighting industry leading lumens per package and enclosed in the Blue-Beam housing it offers a totally flexible IP68 solution for any type of application.

At an average mounting of 1.5m using the K2 Cool White the size of the beam would be 1m Diameter with a light level of 60 LUX.

This fixture is ideal for high level applications and awkward out of the way mountings, delivering a good punch of light.
