SM Console

The Stage Management (SM) Console is your perfect partner for reliable and consistent control.

For over 15 years, we have expertly fine tuned the SM Console specification, understanding your performance demands to deliver the perfect product for your space.

Coordinating both backstage and front of house applications with ease, GDS design and manufacture bespoke SM Consoles to cater for any size entertainment venue, on an international scale.

Intelligent stage management control systems, designed and built to your exact specifications.

Fiberglass enclosure

Both compact and lightweight, the fiberglass SM Console has been specifically designed for medium to large theatre installations.

Easily removable from the unipolar stand, it is well suited for control room and front of house operation.
